*This promotion is for the end user / customer

HM Defense

222 Homan Way Mount Orab , OHIO 45154 937-444-6500 Info@hmdefense.com

IMPORTANT

The HM50B2 is a Precision Rifle. The 50 BMG is not a SAAMI Spec Cartridge. Use the following ammunition to ensure good extraction:

Best Ammo Tested:

- * PPU 625 Gr Rangemaster
- * Hornady (New 750 AMAX Match Has Purple Primer Seal).
- * Barrett 661 Gr

The 50 BMG not a SAAMI spec cartridge. Brands of 50BMG ammo not listed above should be considered carefully before purchasing. From our experience and testing, most of the issues with 50BMG ammo comes from poor case annealing, some have little to no annealing, which will cause extraction problems after firing.

We have tested many brands of 50 BMG ammo. If they are not on the list above, there is a reason.

If you're a hand loader, best results come from making sure cases are properly annealed. This will ensure the brass will spring back after firing, release from the chamber and provide smooth extraction.
